Fred has been active in martial arts/sports since childhood. He served in the French Special Forces, where he honed his already impressive close combat skills. He became the Taekwondo champion of France in the '90s as well as stick fighting champion. When I met him in Paris he was teaching the state police.

Fred Perrin is also a highly talented knife designer and actively incorporates elements of martial arts into his knife designs. He collaborates with martial arts experts to gather feedback and refine his products, highlighting the importance of practical application in real-world scenarios.

His favorite type of knives are tactical knives, but he does not consider them as weapons only, instead he tries to make his

blades multifunctional, practical and reliable. This is why his products are loved by knife enthusiasts from all over the world!
